Subject: Microsoft Settlement

Dear Sirs: As a computer user, and a concerned US citizen, I am delighted that the Microsoft case is near settlement. In my opinion a final settlement in favor of Microsoft is overdue. A favorable settlement would allow Microsoft to return fully to the business of developing more beneficial software and operating systems in the computer industry, and would certainly have a positive and stimulating effect on the US economy. I am fairly familiar with the nearly four year litigation against Microsoft, and at no time have I felt that there was a viable anti-trust case against them. Discussions with my computer literate, and non computer literate friends, overwhelmingly agree that a settlement is good for them, the industry, and the US economy. Thank you for your time and consideration. Respectfully, Lee A. Cueroni, Commander, USN (ret.) God Bless America.
